My precious Honey Love:

When I woke this morning, the first thought that entered my mind was that I should have to wait all that time to see, right to see you again and I wondered how it would ever pass. Yet here it is 5 P.M. — almost one day gone — and, precious mine I am so tired that my back simply feels broken

my ground — and told him just where he is a little mistaken. If Eva he got me provoked it was to-day — ~~such~~ so much so that I was on the verge of quitting. Will tell you all about it when I see you

Precious I am exhausted — so I shall close with a little reminder of how much I love you.

I am afraid, honey, if, when I get home, I feel like this I will have to go straight to bed. I will call up, however, if I don't feel better.

And all this — not because we had such a terribly awful hard day but because Mr. Swallow came in with a grouch. And when he tried to tell me what a crick I had off, I just stood on

Lovingly
Frances.

Hope I get a letter
when I reach home.
